Education

Georgia Institute of Technology

Bachelor's in Mechanical Engineering

GPA: 3.04

Atlanta, Ga

Aug. 2025 - Present

Armuchee High School

High School Diploma

GPA: 3.98

Armuchee, Ga

Aug. 2021 - May 2025

Experience

Intern

A&L Shielding

May 2026 – Aug. 2026

Rome, Ga

- Supported the fabrication and assembly of proprietary radiation-shielding door systems for medical and industrial environments.
- Operated CNC machinery to manufacture precision components according to production specifications.
- Collaborated with a production team to assemble, modify, and inspect components in the manufacturing process.
- Assisted with a variety of fabrication and machining tasks to support production efficiency and meet project requirements.
- Developed hands-on experience with CNC machining, manufacturing processes, dimensional accuracy, material handling, and quality control in an engineering-focused production environment.

Team Leader

Chick-Fil-A

Sep. 2022 – Aug. 2025

Armuchee, Ga

- Directed daily operations in a high-flow fast paced environment, ensuring a consistent customer-oriented focus
- Practiced conflict resolution to ensure smooth team member interaction and unity
- Trained team members to practice customer-first operations, prioritizing guest experience, and applying 2nd mile service

Projects

Custom E-bike rear sprocket | CAD

Sep. 2026

- Designed a custom 45-tooth rear sprocket in Fusion 360 for a given platform (Surrey Ultra Bee) incorporating vehicle-specific mounting and meeting dimensional requirements
- Developed the sprocket mounting pattern using precise dimensional constraints ensuring proper fitment and chain alignment

Custom Motorcycle License Plate Bracket | CAD

Aug. 2026

- Designed a custom license plate mounting system in CAD, incorporating motorcycle-specific mounting constraints
- 3D printed and assembled prototype components, evaluating fit and functionality during installation
- Conducted real-world testing and iterated the design to address fitment, durability, and functional requirements

CS1301 Class Project | Python, Streamlit

Sep. 2025

- Developed functional Web Application with Python and Streamlit
- Engineered a dynamic platform enabling real-time interaction with complex datasets

Skills

Coding: Proficiency with Python and MatLab

Software: Some Fusion360 experience, Microsoft Office (certified in Excel & Word)

Technical: Experience operating and troubleshooting additive manufacturing equipment (3D printing) and CNC equipment (Multiax)

Languages: Spanish (intermediate), English (native)
